

# Seamless integration

As the preferred platform for Optomate Premier, Bluewave's computer networks streamline practice operations by providing fast and reliable access to the market leading practice management software.

Bluewave's key industry partnerships and practical experience has also ensured our solutions allow for the centralisation and integration of data from all aspects of a modern practice including clinical testing, consulting, dispensing and administrative functions.

Once integrated, staff are able to efficiently access and update critical information when and where they need it including patient details, test results and images, stock and lens ordering systems, bookkeeping software and email communication.

## Practice Integration Services

### Dispense

- Use Optomate to view and edit patient records during the dispensing process
- Link Essilor VisyOffice and Rodenstock Impressionist to Optomate and lens ordering software

### Pre-Test

- Capture images and test results directly to central server including perimeter/fields, fundus and slit lamp cameras, OCT and IOL
- Use electronic acuity testers
- Link lens meters and auto-refractor heads to Optomate
- Use ZEISS VISUPAC software for comprehensive image and test result management

*Bluewave is a Carl Zeiss approved 3rd party vendor for computer networking solutions*

### Consulting Room

- Use Optomate to access patient history including the review of test images and results, script details and referrals
- Use ExamWRITER to complete patient examinations

*Bluewave is Monkey Software's preferred supplier of computer networks for use with the Optomate practice management software including the ExamWRITER clinical module*

### Reception

- Download health insurance codes directly from Optomate's account screen to the HICAPS device from multiple sales/reception PCs
- Use bar code scanner linked to Optomate for fast and accurate sales and stocktake processes

### Lab

- Combine patients' scripts with frame trace measurements to complete broadband online lens ordering

*Bluewave is an Essilor preferred Winlinx installer on Terminal Services Networks*

### Office

- Complete administrative and marketing tasks using MYOB and Microsoft Office applications
- Use flatbed scanner to scan patient reports and referrals to the server and link to Optomate patient file
- Physically store and protect server hardware
- Remotely access system from home or while away on business

*Bluewave is a MYOB Reseller and installer*

*Bluewave is a Microsoft Partner*
